

Patrick Mulholland

Junkosha Technology Innovator of the Year Award Judge

Patrick Mulholland is the founder of VistaMed, a leading contract development and manufacturing organisation serving many of the world's multinational companies in the minimally invasive device business. With over 30 years of experience in the medical device industry, he has worked with world class innovators and entrepreneurs co-developing solutions for their demanding applications.

After graduating in Mechanical and Polymer engineering, Patrick worked in the processing of thermoplastic fluoropolymer tubing and compounds. Over the next decade, he gained multidisciplinary experience working with three multinational medical device companies. His career in the medical device design, development and manufacturing business would lead to the establishment of VistaMed in 1998. Over the years, VistaMed has continually invested in the latest technologies to meet the increasingly demanding performance requirements within the MIS (minimally invasive solutions) medical device business.

Patrick is a family man with a supporting wife and is the father to two daughters and a son. In his free time he enjoys water sports, skiing, golf and of course technology.
